

Riccardo Vinciprova – Front-End & Full-Stack Developer

Languages: Italian (Native) English (B2)

(+39) 338 561 55 23 | vinciprova.r@gmail.com | [Linkedin](#) | [Github](#) | Rome, Italy

Experience

Front-End Web Developer, Freelance Work – Remote

06/2024 – Present

Provided front-end development services for private clients and startups, building custom web applications, integrating APIs, and optimizing user experiences through contract-based collaborations.

- Developed and optimized UI components in Angular for web applications.
- Fixed bugs and improved application performance, ensuring a smooth user experience.
- Integrated APIs and backend services to enhance UI functionality.

Full-Stack Developer - Independent Project - Movie & TV Bookmark

06/2024 – Present

A web app for organizing, tracking, and bookmarking movies and TV shows, featuring a responsive UI, real-time API data, user authentication, and AI-powered search using OpenAI. Designed and developed entirely by me as a personal project.

Live Demo: [/movie-tv-bookmark.netlify.app](http://movie-tv-bookmark.netlify.app)

- Implemented authentication and user management, allowing users to save and track their favorite media.
- Integrated external APIs (TMDb API) to fetch movie and series data dynamically.
- Tech Stack: Angular 19, Supabase, Netlify, NgRx, TailwindCSS, API Integration.

Front-End Web Developer, Global Sistemi – Remote

02/2023 – 06/2024

After a career-refocusing sabbatical, I returned as a Front-End Developer Consultant for the **Emilia-Romagna Regional Public Administration**, working in a small team with a reference manager and QA, with full autonomy over the workflow using **Angular 14**.

- Creation and maintenance of **reactive and template-driven forms** and UI components.
- **Bug fixing and debugging** UI components using browser dev tools (Chrome, Firefox, Edge).
- Handling **asynchronous operations** and **state management** for API data fetching.

Work/Travel, Sabbatical, Australia

07/2022 – 02/2023

Driven by the desire for personal renewal after Covid, I embarked on a work-travel experience in Australia, a country I had long wanted to explore.

- Engaged in seasonal work across Australia, gaining **cultural exposure** and **improving English language** proficiency.
- Developed **adaptability** and problem-solving skills through diverse, hands-on experiences.
- Enhanced interpersonal and professional skills, enriching **personal and professional growth**.

Front-End Web Developer, Atomtech – Verona, Italy

04/2018 – 07/2022

Worked with the same company on projects for three different clients: Generali Assicurazioni, Reply, and Accenture, contributing to various development and implementation tasks. I transitioned into a consulting role to take on greater responsibilities and achieve a higher salary.

- **Generali Assicurazioni:** **architectural migration** of an insurance portal from AngularJS to Angular 5.
- **Reply:** Collaborated in an international team to develop and maintain an Austrian banking portal (UniCredit).
- **Accenture:** Developed features and fixed bugs for a banking portal (Intesa SanPaolo).

Full-Stack Web Developer, Almaviva – Rome, Italy

09/2016 – 04/2018

Driven by a desire for self-improvement, I studied programming as a self-taught learner before being hired for my first experience. This began with an onboarding process, which included a three-month preparatory course, after which I was integrated into a team, working on a banking portal (Intesa Sanpaolo).

- Developed and debugged features in a **banking environment**, supporting digital transformation efforts.
- Collaborated with **cross-functional teams**, ensuring agile methodologies drove continuous improvements.
- Increased data processing efficiency, improving overall system performance for end users.

Diverse Work Experience, Rome, Italy

01/2009 – 09/2016

During this period, I worked in various roles before transitioning into web development, including retail assistant, private security, and court audio technician for civil and criminal proceedings. I also lived and worked in London for a year as a retail assistant.

Skills

Languages & Frameworks

- JavaScript (JS), TypeScript (TS), Angular 19 (Angular 5–19), HTML5, CSS3, SQL, Java, Spring Boot

Libraries & Frontend Tools

- NgRx (State Management), RxJS (Reactive Programming), Webpack (Module Bundler), Tailwind CSS, Angular Material

Development & Testing Tools

- Git (Version Control, GitHub, GitLab), SonarCloud (Code Quality Analysis), Cypress (Automated Testing, End-to-End Testing), Supabase (Backend as a Service), Netlify (Cloud Deployment), Visual Studio Code (VS Code), Eclipse (Java IDE), Maven (Build Automation)

Databases & Backend

- PostgreSQL (Postgres, SQL Database), DB2 (IBM Database), Node.js (JavaScript Runtime)

Advanced Frontend Concepts

- Responsive Design, Mobile-First Development, Progressive Web Apps (PWA), Debouncing, Infinite Scrolling, Lazy Loading, Event Delegation, API Integration

Education

ITC Leonardo Da Vinci – High School Diploma Accountant/Programmer – Rome

09/2002 – 06/2007
