

Riccardo Vinciprova

Web Developer (Full-Stack) | Languages: Italian (Native) English (B2)
(+39) 338 561 55 23 | vinciprova.r@gmail.com | Rome, Italy | [Linkedin](#) | [Github](#)

Experience

Full-Stack Web Developer, Global Sistemi – Remote 02/2023 – 06/2024

- Developed and maintained a PA portal for Emilia-Romagna, **optimizing performance** for high-volume user info.
- Enhanced **UX/UI elements**, improving user engagement and usability for government service access.
- Collaborated closely with QA and project leads in **agile** workflows, ensuring project milestones were met.
- Managed task distribution and updates in **Jira**, contributing to streamlined project flow.

Work/Travel, Sabbatical, Australia 07/2022 – 02/2023

- Engaged in seasonal work across Australia, gaining **cultural exposure** and **improving English language** proficiency.
- Developed **adaptability** and problem-solving skills through diverse, hands-on experiences.
- Enhanced interpersonal and professional skills, enriching **personal and professional growth**.

Full-Stack Web Developer, Software Partner Italia – Remote 02/2020 – 07/2022

- Implemented **data validation and security patterns** to ensure compliance with industry standards.
- Coordinated with Unicredit's QA team in English, refining frontend and backend functionalities.
- Applied **agile methodologies** to ensure consistent delivery of stable and reliable applications for end users.

Front-End Web Developer, Atomtech – Verona, Italy 04/2018 – 02/2020

- For Generali Assicurazioni: **architectural migration** of an insurance portal from AngularJS to Angular 5.
- For Accenture (Intesa SanPaolo): Developed features and fixed bugs banking portal in a multidisciplinary team.
- Enhanced stability and functionality of enterprise platforms through feature development and bug fixes.

Full-Stack Web Developer, Almaviva – Rome, Italy 03/2017 – 04/2018

- Developed and debugged features in a **banking environment**, supporting digital transformation efforts.
- Collaborated with **cross-functional teams**, ensuring agile methodologies drove continuous improvements.
- Increased data processing efficiency, improving overall system performance for end users.

Projects

Movie & TV Bookmark: [/movie-tv-bookmark.netlify.app](https://movie-tv-bookmark.netlify.app) 06/2024 – 09/2024

- Developed a web app for users to search, bookmark, and organize movies and TV shows, showcasing front-end skills.
- Designed and implemented state management using **NgRx** and **RxJs**, improving app performance and UX.
- Integrated **Supabase** for user authentication and database management, enabling secure **CRUD operations** with **JWT**.
- Deployed the application on **Netlify** with responsive design using **Tailwind CSS** for cross-device compatibility.
